

Drive savings of 15-30% with Continuous Efficiency

Customized services that take you from planning to savings faster

If your current energy efficiency efforts are inconsistent, continuous efficiency may seem like an unreachable goal. But, efficiency doesn't have to be all or nothing. Continuous efficiency can begin with a simple commitment to continuous improvement, even if you start small. With our expert guidance, your efficiency strides can be slow and steady or supercharged.

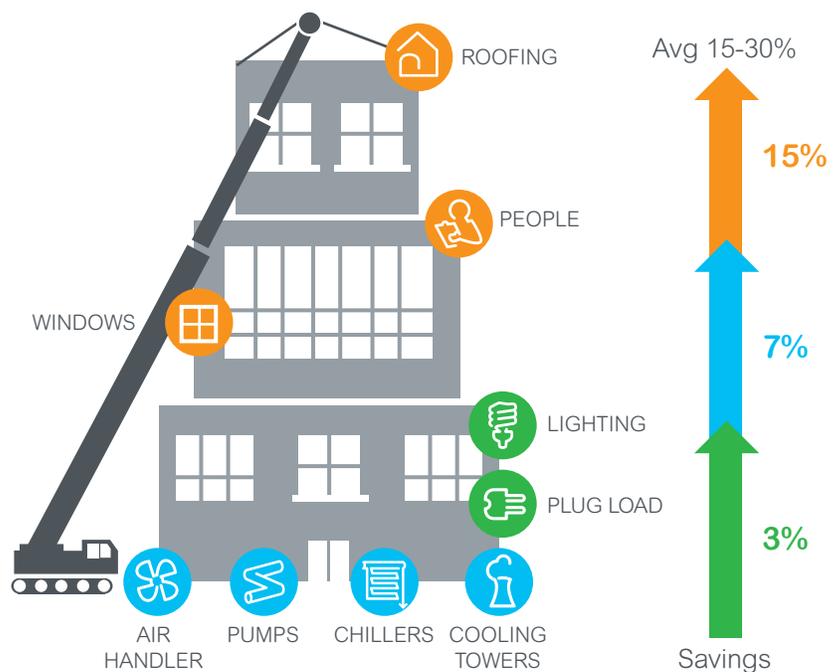

A custom approach delivers more value

Your journey toward greater efficiency will depend on a number of variables. A program customized to your unique situation is critical. We're here to design an efficiency strategy that meets you where you are and evolves as your needs change.

There are three primary entry points to greater efficiency:

- Utility Management
- Facility Management
- Operations Management

Our efficiency experts work with you to explore each area, mine the opportunities and capture the savings.

Life Is On

Schneider
Electric

Utility Management – 3% savings

We give you a clear picture of your energy usage to help reduce your consumption and costs.

We use monitoring technology or connect to your existing infrastructure to capture your monthly or interval utility data. We track your plug load usage, costs, bills and overall performance to develop a reduction strategy. We track your progress, identify overuse at the site level and quantify savings.

Service benefits	Service deliverables
<ul style="list-style-type: none">• Data quality and consistency, report accuracy• Single point of contact for all efficiency services• Access to interval data analysis platform• Training, system set-up	<ul style="list-style-type: none">• Savings opportunities report (using your actual utility rates)• Benchmarks against like companies

Facility Management – 7% savings

We recommend equipment and systems improvements so you can prioritize projects.

We monitor your energy-intensive equipment: pumps, chillers, HVAC, lighting, cooling towers, etc. Our ongoing analysis identifies root cause of problems so you can take corrective action and optimize performance. And, if your efficiency gains slip, our alerts will signal you to respond quickly.

Service benefits	Service deliverables
<ul style="list-style-type: none">• Cost savings measurement and tracking at the system and equipment level• Streamlined operations and maintenance activities• Single-source integration of new technology (if applicable)	<ul style="list-style-type: none">• Critical equipment monitored• Technology recommendations• KPI development• High-level facility audit• Enterprise portfolio reports

Operations Management – 15% savings

We look at operations across your entire enterprise to identify ways to improve performance.

Energy operations often extends across multiple departments and stakeholders. That's why collaboration is the most effective way to drive the greatest efficiency returns. We monitor employees' behavior, system interactions and your corporate governance structure to drive the greatest energy efficiency improvements throughout your organization.

Service benefits	Service deliverables
<ul style="list-style-type: none">• Behavioral and cultural changes around energy awareness• Analytics developed according to strategic vision• Sustained results through technology and a repeatable model• Right-sized monitoring by location	<ul style="list-style-type: none">• Detailed business case• Reporting, analysis by location• Corporate advanced efficiency management strategy• Detailed assessment of all energy flows, systems• Collaborative plan reviews by location
